

Bob Vinson hired as Vice President of Manufacturing for Woodings Industrial and Munroe Inc.

Woodings Industrial/Munroe Inc. is pleased to announce that Bob Vinson has joined the company to fill the newly created role of Vice President of Manufacturing for both Woodings Industrial and Munroe Inc.

Bob will oversee and manage all operations of the five manufacturing plants under the Woodings and Munroe umbrella.

"Bob's extensive background in both manufacturing and operations, combined with his deep technical expertise, will help us achieve increased operational synergy and efficiency that will benefit our customers," said Rob Woodings, President. "Bob's proven track record of maximizing the utilization of personnel and facilities will result in improved scheduling and delivery. We also will enhance operational integrity, since Bob will serve as the locus of communication for all of our operations."

Bob's background includes over 20 years of management and leadership experience in a variety of industrial machine building, machining and steel fabrication businesses such as Swagelok, Ajax-Ceco, Willoughby Supply and Barth industries.

Bob Vinson, Vice President of Manufacturing

"We are thrilled to have an individual of Bob's stature join our team and look forward to him leading the charge to better serve our customers and to expand opportunities in markets such as co-generation and pulp and paper," stated Woodings.

A graduate of the Ohio State University with a BS in Mechanical Engineering and an MBA from Cleveland State, Bob is a skilled proponent of Lean manufacturing principles and is a Six Sigma Greenbelt. He is also a Certified Project Management Professional.
