

HELL ON EARTH

Just another day at the office for our equipment.

When you need equipment that withstands the rigors of hot metal production, you need Woodings and Munroe—the Powerhouse in Hot Metals.

Over 300 years of hot metal experience results in equipment with the design and quality needed to perform reliably in the most demanding environment on earth.

Wherever hot metal is produced you'll find equipment from Woodings Industrial and Munroe operating at the highest level.
